

HEAVY RECOVERY VEHICLE

World class Civil Defense Departments require world class equipment. CHIL Recovery Vehicles are engineered to precision to be able to recover the heaviest of vehicles, from most difficult situations. With capacity of up to 40 tons in its winch, this vehicle can literally pick up a prime mover vertically! With Pakistan's Rescue Departments adding CHIL Recovery Vehicles to their fleets, they are ready to provide world class rescue services as Pakistan gears up for massive transportation and trade operations under larger than ever public projects.
